ROAD FEDERATION
in association with**

THE CANDIDATE ACADEMY

PRESENTS a 2 DAY VIRTUAL COURSE

**GETTING ACQUAINTED
WITH BEING A RESIDENT
ENGINEER**

PRESENTER

Jan Bierman Pr Eng, BEng (Civil)

**Thursday 31st March – Friday 1st
April 2022**

**This course will be presented
via Microsoft Teams**

About the Course

A two day course to guide Resident Engineers in their specific functions, roles and responsibilities on site.

Attend this course and learn about:

- Duties of the Resident Engineer
- Dealing with the client, engineer, contractor, community and other role players
- Relationships, ethics and responsibilities
- Good record keeping and contract management
- Inspection, tests and approval of construction activities
- Quality control and evaluations
- Measurement and payment certificates
- Supervision and site management

Benefits include:

- Comprehensive manual for road supervision and municipal services e.g. water, sewer and drainage
- Worksheets and checklists for construction activities
- Supervision advice, tips and dangers
- List of key success factors
- Excel program for measurement backup, quality control and statistical analysis
- CPD credits (ESCA)

WHO SHOULD ATTEND

The course helps graduates apply their theoretical training in practice. It is therefore recommended for:

- Candidate engineers, technologists and technicians whose aim it is to master the necessary skills towards becoming a respected Senior Resident Engineer of

excellence on road construction projects and municipal projects for water, sewer, stormwater and other drainage.

- Assistance Resident Engineers working on road construction and other construction projects
- Resident Engineers with limited experience
- Project Engineers from Government bodies working on construction projects
